SUPERIOR SOLUTIONS FOR

AGRICULTURAL VEHICLE LIFTING

STERTIL
SUPERIOR SOLUTIONS

Superior Solutions

Stertil-Koni provides customised and technically advanced solutions for heavy-duty lifting requirements for customers throughout the world, including the best possible service from skilled local partners. These superior solutions are conceived, developed and implemented by a team of professional specialists with unique expertise. Thanks to the quality of its people, its entirely in-house production and its international organisation, Stertil-Koni is the world's number one in heavy-duty vehicle lifting. In addition to the commercial vehicles market, Stertil-Koni has a sharp focus on the agricultural sector, developing specific lifting solutions for agricultural vehicles and towed equipment.

Ergonomic, safe and time-saving

Maintenance of agricultural machinery is often performed lying down, or sitting beneath the vehicle. The usual lifting aids such as jacks, overhead cranes and forklifts provide insufficient safety and as a consequence, mechanics have to work in unsafe and difficult circumstances underneath the machinery or vehicles.

Stertil-Koni vehicle lifts provide a complete ergonomic and safe solution, allowing the mechanic to stand while repair or maintenance work is carried out. Tractors and other heavy vehicles with large tires can be effortlessly lifted. The versatility of the various Stertil-Koni vehicle lifts is that a wide range of machinery and vehicles can be lifted with the same vehicle lift.

SAFE EFFICIENT

and HEALTH and SAFETY compliant

Stertil-Koni wireless mobile column lifts

From the longest trailer to the widest Combine Harvester, from a single axle to a ten axle articulated vehicle, Stertil-Koni wireless mobile column lifts provide the superior lifting solution. Very versatile for lifting a wide range of agricultural machinery and vehicles safely with an ideal working height adjustable within seconds. In any suitable location, in a wireless-controlled configuration that enables synchronised lifting and lowering.

Stertil-Koni mobile column lifts have the ebright Smart Control System. An easy to use touch-screen display.

Stertil-Koni Universal Solutions

Stertil-Koni has developed a number of special adapters and other accessories for agricultural vehicles, such as an adjustable wheel clamp and a broader crossbeam. In a three-column configuration for towed equipment, the mobile column lifts are fitted with a special 'pin and ball tow hitch.' With capacities of up to 70 t per lifting system, Stertil-Koni vehicle lifts can lift heavy agricultural machinery and vehicles at the touch of a screen.

- **Independent mechanical locking system**
Engages after 125 mm lifting stroke. Locking pawl engaged by gravity.
- **ebright Smart Control System**
- **Locking profile**
With increments of 35 mm.
- **Obstruction protection**
- **Automatic overload protection**
- **Reliable hydraulic system with long life cycle technology**
